Cackling goose and Canada goose breeding range

Main differences between species

Cackling goose (*Branta hutchinsii*)
- Nests commonly found on Bylot Island
- Breeds only in the Arctic
- Small body (1-2 kg)
- Short neck and beak
- High-pitched, short calls

Canada goose (*Branta Canadensis*)
- Rarely nests on Bylot Island
- Breeds across most of Canada and northern U.S.
- Large body (3-5 kg)
- Long neck and beak
- Low-pitched, long calls
